The Dean Iris Gardens

Moneta, California

(Los Angeles County)

1914 - 1915

OUR illustrated catalogue, containing valuable information on the Iris and listing over two hundred varieties, will be mailed on receipt of fifteen cents in stamps. It contains a color plate of I. Caterina, which alone is worth the price asked for the catalogue.

Iris Sibirica

PRICE LIST

The prices quoted herein cancel all previous quotations made either by letter or in printed lists.

Prices include delivery on all plants quoted, anywhere in the United States, except those at the 100 rate, and also provided order is for not less than \$1.00 in value. For orders for less than \$1.00 in value, add 5 cents per plant to cover postage. Plants ordered at the 100 rate are sent at purchaser's expense, either by Parcel-post or by Wells Fargo Co., whichever is the cheapest. We will furnish six plants of one kind at the dozen rate or twenty-five at the hundred rate.

Terms are cash with order. Remittances can be made by Post-office or Express Money Order, or by Bank Draft, payable to The Dean Iris Gardens.

We would suggest to those not familiar with the cultivation of the Iris, that the *Oncocyclus* and *Regelia*, and all bulbous species, must be planted in the Autumn, and nearly all others should be planted then. A very few species do better planted in Spring when new growth is about to begin. The bearded Irises can be planted almost any time in a mild climate like ours, but do the best planted in August or as SOON after as possible. Orders for bulbous species, as well as *Oncocyclus* and *Regelia* varieties, should be in early, by the middle of September at the latest.

IMPORTANT NOTICE.—We exercise due care to keep all varieties TRUE to name, and hold ourselves in readiness at any time to replace, on proper proof, any stock that may prove otherwise; but it is mutually agreed between the purchaser and ourselves that we shall not at any time be liable for any amount greater than the original price of the stock. All sales made subject to stock being unsold when order is received, or loss by any and all unavoidable causes.

BEARDED IRISES—VARIOUS SPECIES

Albicans, Princess of Wales. Beautiful pure white.....	.15	1.50	5.00	
Benacensis. S. violet; F. deep rich purple.....	
Biliotti. S. blue-purple; F. reddish-purple. 26 in.	
Carthusian. New handsome hybrid. S. clear lavender-blue; F. darker blue, reticulated brown at claw. Flowers large and fragrant. 2 ft.50	5.00	
Caterina. One of the late Sir Michael Foster's hybrids. S. clear light blue; F. soft lilac-blue, deliciously fragrant. 4 ft. (Color plate and further description of this Iris in our catalogue)	1.00	10.00	
Ciengialti. S. lavender-blue; F. soft violet-blue.....	
Flavescens. A delicate shade of soft yellow.....	.25	
Flavescens Munite. S. chamois yellow; F. primrose, reticulated lavender25	
Florentina. Creamy white, faintly flushed lavender. Very fragrant15	1.50	5.00	
Florentina, Silver King. Purer white than above.....	.15	1.50	
Florentina, Queen Emma. Pure white, faintly flushed blue15	1.50	
Lurida (var. <i>Redouteana</i>). Mahogany-red. Distinct and rare. 18 in.	
Mesopotamica. S. soft blue; F. violet-purple. A new species from the East, of exceptionally strong growth, and producing massive flowers on stems 4 to 5 feet tall. The foliage with us does not die down in the winter, and last season it came into bloom about the middle of March. A most magnificent Iris. It seems unfortunate that it is going out under the catalogue name of <i>I. Junonia</i> . According to the description of <i>I. Junonia</i> , in <i>The Genus Iris</i> by Mr. Dykes, it is quite distinct from this, although the true <i>Junonia</i> is a very fine Iris, but not in commerce at present	1.00	
Sambucina. S. coppery-rose; F. rosy purple. 2 ft.....	.15	
Sambucina, Beethoven. S. rose-lilac; F. purple, orange beard. 2 ft.25	
Sambucina, LaVesuve. S. lavender, flushed bronze; F. violet. 2 ft.25	
Sambucina, Mephistopheles. S. clouded lavender; E. rich purple, flushed blue25	

	Each	doz.	100
Trojana (syn. <i>I. Cypriana</i> of commerce). These fine Irises are produced on branching stems, 3 to 4 feet tall. The flowers are large, very fragrant, and bloom in June. This is the species described in The Genus Iris by Dykes as <i>I. Trojana</i> . The true <i>I. Cypriana</i> also described by him is not in commerce.....	.25	2.50	15.00
Trojana Celestial. A handsome blue-flowered form.....	.35
Trojana magnifica. S. violet-blue; F. violet-purple.....	.35	3.50
8trojana superba. S. soft blue; F. rich clear violet. Fine..	.35	3.50
